## PAYSHOWER COIN TIMERS

## A PROFITABLE INVESTMENT!

**SEM** proudly presents its latest coin shower timer made of high quality stainless steel.

The **SEM** Coin Timer series contributes significantly in reducing your hot water energy cost as well as wastewater treatment, along with generating substantial revenues. Additionally,

our timers are much more than an administrative choice for your business; it is the guarantee of durability, reliability, and unique features that will elevate your customer overall experience.

Our latest generation of timer now comes with an improved controller, designed and manufactured by **SEM**, as always with the utmost quality. New options are now available including our new "SLB" pushbutton module. This module mounts easily in the shower and gives the ability to start or interrupt the flow of water when desired. Furthermore, the embedded LED blue indicator and the adjustable beeper alert the user of the upcoming end of the session, a feature that your customers will greatly appreciate.

Three models are available: The economical **4500TS**, the **5500TS** offering higher security and 50% increased capacity cashbox, and ultimately the **5500TX** incorporating a time display and offering advanced programming features.

Since 1978, **SEM** manufactures high-quality products backed with an unparalleled after-sale service that have contributed to our reputation.

**SEM...your money systems partner!**

**4500TS**

**5500TS**

**5500TX**
